

# Creating a Landmark

The Interchange will be a new landmark between the Castle and the Landscape.

## A Building of its Place

The Interchange must relate to its context and be “distinctly Caerphilly”; part of the wider journey to destinations within the town and beyond.

## Easily Recognisable

As a landmark, the Interchange should be easily recognisable; a destination in its own right which enables people to establish their location.

## Permeable & Connected

The building should connect with the people and places around it, bringing the landscape in, and permitting views out.
