

Meaningful Objectives

Some of the things we want to achieve at Caerphilly Interchange.

Through our design studies, and engagement with stakeholders we will transform the station's current poor customer experience by creating a modern, sustainable, living interchange and public realm.

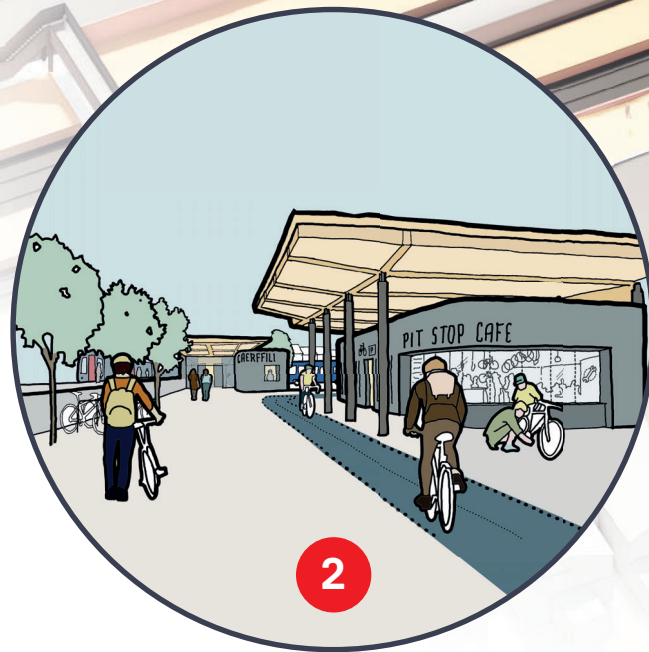

Here we have illustrated just some of our initial ideas which will put people first, creating a high quality, safe, integrated and accessible station environment to stand the test of time for future generations.

“ Easy to use and accessible to all. ”

“ The story of Caerphilly Castle starts here! ”

“ Dedicated community and cycle hub to encourage a shift to healthier sustainable travel. ”

“ Making the most of the cheek-to-cheek interchange for more convenient journeys. ”

“ A flexible mix of community spaces making the station a destination in its own right. ”

“ The Interchange can be an anchor destination for the High Street. ”
